

Yesika Y. Roa Perez - Full Stack Developer

San Cristóbal, Venezuela | yroa1402@gmail.com | yesikaroa.vercel.app

LinkedIn: linkedin.com/in/yesikaroa | GitHub: github.com/YesikaRoa

PROFESSIONAL PROFILE

Systems Engineer and Full-Stack Developer with over 2 years of experience designing, developing, and deploying high-impact technological solutions. Specialized in the JavaScript/TypeScript ecosystem, with a robust capability to architect secure, structured backend systems and build intuitive, dynamic frontend user interfaces. Focused on solving complex problems through collaborative development, agile methodologies (SCRUM), and the strategic integration of Artificial Intelligence (AI-Assisted Development) using Prompt Engineering and automation to optimize engineering workflows. Experienced in cloud infrastructure management (AWS) and deeply committed to software quality, clean code, and scalability.

PROFESSIONAL EXPERIENCE

Tobal Systems

January 2025 - Present

Full Stack Software Engineer

- Developed scalable web applications utilizing React.js and Node.js, ensuring optimal performance and responsiveness.
- Implemented advanced AI-assisted development workflows with Cursor AI, Claude, and v0, embedding custom context configuration files (.cursorrules) to standardize team patterns.
- Designed database architectures using Prisma ORM, PostgreSQL, and MongoDB.
- Managed cloud infrastructure utilizing AWS services (EC2, S3, RDS, Lambda) along with advanced monitoring and logging via CloudWatch.
- Collaborated actively in agile environments following the SCRUM methodology.

Independent Developer / Freelance

December 2023 - January 2025

Full-Stack Developer

Featured Projects:

- **Smart Agent:** An automated End-to-End technical support ticket management system built with TypeScript and React. It features an AI Agent capable of interacting with users through an n8n workflow orchestrator, connecting Express, Prisma, PostgreSQL, and a Groq Chat Model to perform database actions (Function Calling) under strict intent filtering.
- **KindredPetCare (PatitasVet):** A veterinary web application with adoption and contact modules developed in Next.js, React, and Tailwind CSS. Integrates an intelligent chatbot connected to Google Gemini via the Google AI Studio API, optimized with advanced prompt engineering tailored for customer service.
- **Libertadores-CS:** A community administration dashboard and dynamic user interface developed in React with Tailwind CSS, featuring automated CI/CD pipelines via GitHub Actions, Cloudinary integration for multimedia storage, and optimized caching with Redis Cloud.

- **MediPanel:** A comprehensive medical management platform and administrative dashboard developed with React, Node.js, and Express, utilizing PostgreSQL and Cloudinary. Features a serverless notification dispatcher built with Cloudflare Workers and Neon DB to manage scheduled medical appointment reminders.

EDUCATION

UNEFA – San Cristóbal, Venezuela
B.S. in Systems Engineering

2021 – 2026

TECHNICAL SKILLS & COMPETENCIES

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, CoreUI.

Backend & Orchestration: Node.js, Express, Cloudflare Workers, n8n (Workflow Automation), Prisma ORM, Swagger, Redis Cloud, Cloudinary.

Databases: PostgreSQL, Neon DB, MySQL, MongoDB, TablePlus, dbdiagram.io, DBeaver, dbgin.

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudWatch), GitHub Actions, Docker, Git, VirtualBox (Kali Linux).

AI & Tools: Cursor AI (.cursorsrules workflows), lovable.dev, Google AI Studio API (Gemini), Claude, Groq LLM, v0 by Vercel, Prompt Engineering, Antigravity, Visual Studio Code, Codex, Insomnia, Postman, Jest, Vitest.

Management: SCRUM, Jira, Confluence, Trello, Slack.

LANGUAGES

Spanish: Native. | English: Technical Proficiency (Technical documentation and professional communication).
